Fender®

ROAD WORN '60S JAZZ BASS®:

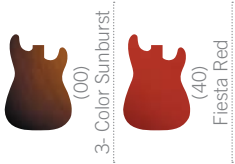

Like classic cars or your favorite T-shirt, some things just get cooler with age. It's especially true of electric basses—they develop an unmistakable mojo over time that only makes 'em look even cooler and feel even more comfortable than when they were brand new. That said, Fender's new Road Worn '60s Jazz Bass guitar was designed with 1960s specs and a nitrocellulose finish to deliver that killer aged look, feel and mojo without breaking the bank. A true player.

300 (3- Color Sunburst)
